

# ANSYS Consulting Services

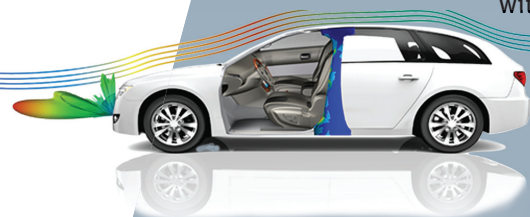

## LET OUR EXPERTS HELP YOURS

Whether you are a first-time user of ANSYS solutions with a single license, or a simulation expert with a team of engineers who have enterprise-wide access to our software, you want to be sure you are getting the most from your investment. ANSYS Consulting Services can ensure you are. If you need mentoring on the most efficient use of a single simulation product; a comprehensive evaluation of your current simulation processes with a roadmap for improvement; or complete installation, set up, deployment and optimization of enterprise-wide simulation software, we can help. We will guide you in selecting the most appropriate consulting service that best meets your unique needs.

### **SIMULATION-DRIVEN PRODUCT DEVELOPMENT (SDPD) ASSESSMENT**

ANSYS expert consultants will audit your product development process and simulation practices, and compare their findings with industry best practices to identify areas where you could be using simulation more effectively. This analysis will be used to develop an SDPD Roadmap — a plan for future simulation process improvements aligned with your key business initiatives and critical success factors.

### **ENTERPRISE DEPLOYMENT AND ADOPTION**

Deploying ANSYS software for enterprise-wide use is the best way to ensure that everyone in your organization has access to our powerful simulation solutions. The ELA Deployment and Adoption package ensures that all components are installed and set up correctly, all IT systems are optimized for best results, and all stakeholders are trained. We analyze your environment and workflows; develop a phased roadmap to build, test and deploy ANSYS software to maximize productivity and adoption; and ensure end users are properly trained and supported to maximize productivity and value delivered.

### EMBEDDED EXPERT

An Embedded Expert is a full-time long-term, on-site ACE team member dedicated exclusively to your organization. Embedded Experts work hand in hand with you, showing you how to use ANSYS simulation solutions most effectively to solve your specific product development challenges. This close working relationship will help you to quickly learn how to use ANSYS software and adopt simulation best practices.

Your Embedded Expert can also help to identify new ways to apply ANSYS technologies and services, saving you time and money as you speed your new product to market.

### MENTORING EXPERT

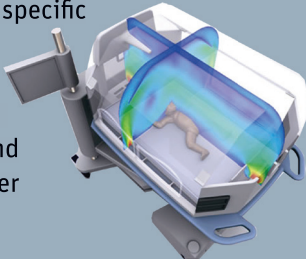

An ANSYS Mentoring Expert will work with you on a short-term basis to show you how to use your ANSYS simulation solutions more effectively. Your mentor can demonstrate features that are unfamiliar to you, or show you how to better perform tasks that you already do routinely. With the help of an ANSYS Mentoring Expert, you'll be able to solve design problems much more efficiently using the knowledge you've gained.

**“We are absolutely pleased how the *project* was executed. The *quality* of the *results* is excellent, and we learned a lot.”**

– Petra Steffe, *MAN Diesel & Turbo*

#### STRATEGIC PROJECTS

If you are applying ANSYS solutions to solve problems in a new field, a Strategic Projects Expert can help. Your Strategic Projects Expert will deliver a finished product — a new workflow, a user-defined function-based on your specific requests. We can help you with simulation workflow improvement, process compression and customization for greater solution flexibility.

#### ENGINEERING KNOWLEDGE MANAGER (EKM) DEPLOYMENT

Get up and running faster with ANSYS Engineering Knowledge Manager (EKM), without facing the risks and costs of going it alone. With deployment services from ANSYS, our professionals will set up your system for simulation data management, remote job submissions and deploy EKM to your user community. EKM Deployment services are the fastest way to maximize investment and reduce time to value.

### ANSYS ENTERPRISE CLOUD (AEC) DEPLOYMENT

The ANSYS Enterprise Cloud (AEC) is the most cost-effective way for you to simulate in the cloud. With the AEC Deployment package, we install AEC in your environment and set up your system for simulation data management and remote job submissions. You will then be ready to deploy AEC to your entire user community.

## ANSYS is Committed to Customer Excellence

### Our team:

- 660+ support engineers
- Over 1,000 developers
- Over 450 Ph.D.s

### Our customers:

- 45,000 customers around the world
- 97 of the top 100 Fortune industrial companies
- The majority of global leaders across industries

### Our guarantee:

- We provide unmatched expertise and experience in solving engineering problems with Simulation-Driven Product Development
- We can help you deliver better products to market faster

If you've ever seen a rocket launch, flown on an airplane, driven a car, used a computer, touched a mobile device, crossed a bridge, or put on wearable technology, chances are you've used a product where ANSYS software played a critical role in its creation. ANSYS is the global leader in engineering simulation. We help the world's most innovative companies deliver radically better products to their customers. By offering the best and broadest portfolio of engineering simulation software, we help them solve the most complex design challenges and engineer products limited only by imagination. Join our nearly 3000 professionals in more than 75 strategic locations around the world in making a difference in the world of engineering simulation and product development.
