Simulating The Future

ANSYS provides valuable resources through incubator partnerships

Increase your value to the entrepreneurial community by partnering with ANSYS to give startups access to our world-leading simulation software. Designing, building and testing prototypes as software models will help them to deliver their new products to market faster and more cost-effectively, beating the competition.

We understand that incubators, accelerators and the entire startup ecosystem play a critical role in the success of a new business. Our goal is to give you the opportunity to connect your clients with our industry-leading software to help them realize their vision in the most cost-effective manner. This is just another way for you to extend your value to the entrepreneur community.

The ANSYS Startup Program gives you full access to a broad range of ANSYS simulation software with several other benefits. Many of the world’s greatest companies began as startups; ANSYS is committed to partnering with you to help today’s startups grow into tomorrow’s industry leaders.

“I have not failed. I’ve just found 10,000 ways that won’t work.”

Thomas A. Edison

Incubator Partnership Qualifications:
• You must be an incubator, accelerator or a support resource for startup businesses
• You must work with startups that are privately held, less than 10 years old and have less than US $5M revenue per year

Program Benefits:
• Provide industry-leading resources to your startups to help them grow their business
• Give your startups access to the full portfolio of ANSYS multiphysics simulation products, including the Structural and Fluids Bundle and the Electromagnetics Bundle
• Gain access to the ANSYS Customer Portal for self-guided support
• Marketing partnership with ANSYS
