

ABOUT US

If you've ever seen a rocket launch, flown on an airplane, driven a car, used a computer, touched a mobile device, crossed a bridge or put on wearable technology, chances are you've used a product where Ansys software played a critical role in its creation. Ansys is the global leader in engineering simulation enabling next-generation advancements from self-driving cars to electric aircraft to connected cities. We help the world's most innovative companies deliver radically better products to their customers. By offering the best and broadest portfolio of engineering simulation software, we help them solve the most complex design challenges and create products limited only by imagination.

"We're witnessing a disruption in product development as the physical and digital worlds merge to generate unprecedented product innovation. The winners will be those who master this complexity and create breakthrough products by leveraging the best practices of engineering simulation and using digital exploration to investigate a larger design space faster."
